How To Avoid Home Remodeling Hell: Your Stress Free Blueprint To New Home Construction Or Home Remodeling Success

Synopsis

I wrote this book because I want you to have a great experience building your new home or remodeling your existing home. It is possible. You don't have to listen to your friends who say, "Oh, remodeling is a nightmare," or "Building a house is a dreadful experience. I'll never do it." I don't want you to be in that category. I want you to be the person at the party who steps back from the circle of guests who are complaining about their architect and their contractor, and how much it cost, and the hardships they went through. I want you to step back from that and smile, knowing that you didn't go down that path.

Customer Reviews

No matter how much they watch HGTV, most people who decide to remodel their home have no idea what is really involved! For too many people, what should be an exciting experience turns into a miserable process. This book clearly spells out every step in the process: choosing the architect, settling on a design, learning the costs, getting permits, and doing the work! It also suggests how the right architect can assure a pleasant experience. Sure, you will have challenges, but the right professionals can quickly resolve them to everyone's satisfaction. If you live in California, this is a *must-read*!
