If I had known what this would do for my 12 year old son, I would have eagerly paid \$100 for it. My son, who isn't in love with school work, first thought this book sounded like it was going to be boring. That was until he read the first couple of pages. Now, we have spent the last three hours solving the codes in the "training" section of the book. He is HOOKED! He's doing "school work" and doesn't even know it! He's reading, writing, and problem-solving... and he's loving every second of it. On top of that, I am enjoying it and we're doing it together. I cannot thank the author enough!

Daughter is 10 and loves this book it inspires her to write and read so it is a win win

My 11 year old daughter loves this book. This was one of her favorite Bday gifts surprisingly. I opened it up and was pretty impressed with the different activities to do in it. Very creative author. I'll buy more in this series for her. Great price too!!

Great for those moments that you want to create/write something and are looking for some inspiration

I got this for my 10 year old daughter and she absolutely loves it.

this was pretty boring and hard to accomplish most of what it wanted and was sometimes a little confusing. didn't like it much

I bought this for my sons birthday. While it is a little too advance for him, I kinda took over and it is a really good way to pass time and get lost in your own world for a while! Veey awesome!

She is 14 years old and she love the book so very much. There are all kind of diffrent things she has to do to before turning a page and that is a great thing. Being Danish she learns a lot of things and language too. Perfect book...
