# Lassen Volcanic National Park (National Geographic Trails Illustrated Map)

## Synopsis

Waterproof Tear-Resistant Topographic Map Lassen Volcanic National Park in northern California is one of the few places in the world where one can see all four types of volcano. National Geographic's Trails Illustrated map of this unusual park offers outdoors enthusiasts a valuable tool for exploring the park's fumaroles, hot springs, mud pots, mountain lakes, and forests. Expertly researched and created in partnership with local land management agencies, this map features trail networks in Lassen Volcanic National Park and the adjacent national forests along with key points of interest including Lassen Peak; the Lassen Volcanic and Caribou wilderness areas; Cinder Cone; Juniper, Snag, and Butte lakes; and the Volcanic Legacy Scenic Byway. The print version of the map includes a detailed inset of the Manzanita Lake area. Over 150 miles of trails including 17 miles of the Pacific Crest Trail and a portion of the California National Historic Trail are clearly marked and include approximate mileage between intersections and trail use designations. A chart of campgrounds, their elevations, the number of sites, and the facilities available at each will help you choose the one that's right for you. Interpretive information regarding the area's unique geology and descriptions of the important hydrothermal areas are also included. The map base shows contour lines and elevations for summits, passes and many lakes. A variety of recreation features are noted as well, including campgrounds, trailheads, picnic areas, boat launches, cabins, and scenic viewpoints. Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Other features found on this map include: Caribou Wilderness, Lassen National Forest, Lassen Peak, Lassen Volcanic National Park. Map Scale = 1:50,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

This map is excellent if you wish to find backroads for offroading or to navigate yourself to outdoor adventures inside and just outside the limits of Lassen Nat'l Park. I bought it not for the park itself, but for the USFS roads surrounding the park. Unfortunately it doesn't contain a ton of info outside the park and duplicates much of what you can find with a cheapo map of the innards of the park itself.

Can't go wrong with these maps.

Great map!

Excellent, gave me trail info I needed to ride my horse in the park, we camped up north by the lake.

The map, like all other Trails Illustrated maps, is absolutely beautiful and has just the right amount of details for driving through the park or hiking. 4 stars because the map is just a little too big for use in a car without a lot of folding, unfolding and flipping over.

good map, has topography and trail mileages
