Ecuador And Galapagos Islands (National Geographic Adventure Map)

Synopsis

Waterproof Tear-Resistant Travel MapNational Geographic's Ecuador and Galapagos Islands Adventure Map, with its comprehensive information, is uniquely designed for adventure travelers. The map delivers unparalleled detail of the entire country and its recreational, historical, cultural and natural destinations. Pinpointed spots include beaches, wildlife areas, archeological sites, churches and areas for camping, surfing, fishing and diving. A list of cities and towns with a user-friendly index is provided along with a road network of highways, major and secondary roads, shown with distances. Unsurfaced and 4-wheel-drive roads are mapped for those wishing to get off the beaten track. Other displayed travel aids include airports, airfields, harbors, anchorage sites, railroads, ferry routes and border crossings with neighboring Colombia and Peru. The northern part of the map covers the capital city of Quito, Cotopaxi Volcano and National Park, Cuyabeno Wildlife Reserve, the town of Tena in the rainforest and the country's largest city of Guayaquil. The southern part of the map covers from Guayaquil to the southern and southeastern border with Peru, showing the diverse Podocarpus National Park in the southern Andes and an ecological systems. An inset map covers the world renowned Galapagos Islands, showing Galapagos National Park and Marine Reserve, Tortoise Reserve and diving areas around the islands. This expertly researched map is the perfect complement to any guidebook. Every Adventure Map is printed on durable synthetic paper, making them waterproof, tear-resistant and tough. • capable of withstanding the rigors of international travel. Map Scale = 1:750,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Best map I've found for our touring around Ecuador, and it goes into a bit more depth than a "Lonely Planet" type of tourist map (nothing against Lonely Planet guide, we never travel without one). However, for actual navigation by map, get a Spanish Language map as it will make a great "pointie-talkie" if you are not handy with Espanol. We have found the best combo is this map, the Spanish map, our GPS, and a smattering of Espanol knowledge, will always provide a firing solution for the day's excursion.

I would suggest to National Geographic to use the copious amounts of unused space on this map for blow-ups of city maps rather than very large pictures of birds and coastal photos. In my opinion, this map could be a lot better just by adding two city maps, Cuenca and Quito...there is plenty of real estate for that...and more.

Alert! Recommend that you DO NOT purchase this map. It is outdated. Does not show the location of the new Quito airport (now 2 years old). Also, I found the map bulky and challenging to fold for specific areas and usage. I regret getting this map (think the map is 8 years old).

This map has almost no value for the road traveler. We found that most major highways are not marked with the correct route numbers, many roads missing and the 2 major cities of Guayaquil and Quito have useless road information. Needs to be updated, corrected and add city maps. What an embarrassment for National Geographic and a headache for those who use it.

This map is missing a surprising amount of detail, and a lot of what is there is inaccurate. There are many missing roads and towns that are fairly major and that one would expect to find on a map offered by National Geo. About half of all the roads we took had numbers indicated on the map that

were not the numbers of the actual roads. (THAT can be disorienting!!) It is OK for finding your way from one part of the country to another, if you are taking public transportation and leaving the driving to someone else. If you plan to rent a car and drive around the country, this map can cause you to become seriously lost. Use it to plan your trip, but buy a better map once you get to the country.

If you are looking for a nice quality map of Ecuador, this is an excellent source. With just about every city labeled on the map, you can find exactly what you are looking for.

The publishers put large photos of animals etc on the map, but what we needed was printed inserts of the largest cities in Ecuador and more details of the towns on the Galapagos Islands. So, if you're going a geography project for school, I guess this map would give you an overview of the country of Ecuador, but as a travel aid it was completely worthless.

This map was of limited use on our driving tour of mostly northern Ecuador, but so was the Ovi map on our Nokia phone. New roads have been built, existing roads upgraded. You have to expect that driving in Ecuador will be an adventure, so the map is appropriately named.
