# Road To Valor: A True Story Of WWII Italy, The Nazis, And The Cyclist Who Inspired A Nation

## Synopsis

The inspiring, against-the-odds story of Gino Bartali, the cyclist who made the greatest comeback in Tour de France history and secretly aided the Italian resistance during World War II. Gino Bartali is best known as an Italian cycling legend who not only won the Tour de France twice but also holds the record for the longest time span between victories. In *Road to Valor*, Aili and Andres McConnon chronicle Bartali's journey, from an impoverished childhood in rural Tuscany to his first triumph at the 1938 Tour de France. As World War II ravaged Europe, Bartali undertook dangerous activities to help those being targeted in Italy, including sheltering a family of Jews and smuggling counterfeit identity documents in the frame of his bicycle. After the grueling wartime years, the chain-smoking, Chianti-loving, 34-year-old underdog came back to win the 1948 Tour de France, an exhilarating performance that helped unite his fractured homeland. Based on nearly ten years of research, *Road to Valor* is the first book ever written about Bartali in English and the only book written in any language to explore the full scope of Bartali's wartime work. An epic tale of courage, resilience, and redemption, it is the untold story of one of the greatest athletes of the twentieth century.

I read Assisi Underground, which was where I first heard of Gino Bartoli. I wanted to know his story. So I read Road To Valor. The book is superbly written. You know the outcome before you start reading it, and yet the book has you at the edge of your seat. It gives such excellent description of Italy at the time, economically and politically. And Bartoli, what a portrayal! I would recommend this for anyone who has an interest in bike racing, Italy, or WWII.

I became interested in reading Gino Bartali’s story after viewing "My Italian Secret". I am not disappointed. The writing is clear, concise, understandable and informative. I am discovering facts of a boy who grew up poor and became a man of distinction and valor. I’m learning facts about cycling of which I was not aware. I am learning that Mr. Bartali was able to combine his athletics with a desire to make a difference. Throughout the reading, I do not have the impression that Mr. Bartali was looking for heroism; rather, I am impressed that a poor man with a generous nature looked toward improving the quality of his family’s life and at the same time participate in a sport he loved from childhood. That he won the two Tours de France made him a hero in society; that he

mindfully used his celebrity to quietly make a moral difference to a people who suffered and lost so much has made him a hero in humanitarianism. This is what I learned from "Road To Valor", a book I'm hard pressed to put down. This is not a sappy adulteration. Its authenticity and research is impressive and leaves this reader appreciative of the authors' work.

"Road to Valor" is an inspirational tale of Italian cycling legend Gino Bartali. From a small town upbringing outside of Florence to his unlikely rise as Tour de France champion in 1938, Bartali's legend is not about his victories against other riders but for his underground contributions during WWII to save lives. As WWII raged on in Europe, Bartali's best years of cycling competition were wiped away. However, instead of capturing the imagination of the public with his exploits in bike races, Bartali rode to save lives. With a plan concocted by a Roman Catholic priest, he began transporting forged documents in his bike frame between Florence and Assisi. These papers became new identities for Italian Jews, their papers for survival rather than transport to concentration camps outside of Italy. Bartali protected those around him through these years, not disclosing his frequent absences from home to even his wife as anything more than training. By the time WWII was over and cycling competitions began anew, Bartali's best days were behind him. However, his performance in 1948 is truly astounding. As Italy teeters on the brink of civil war, Bartali shocks his fellow racers with an epic ride through the Alps in what unimaginable weather conditions. By the time he is done conquering the mountains, he wins his second Tour de France in staggering fashion. To this day he holds the distinction for longest gap between Tour victories. In today's age of diet, conditioning and nutrition, Bartali's chain-smoking, red wine drinking will undoubtedly leave modern athletes shaking their heads a bit in disbelief --- I certainly wondered how he survived to even win the 1948 Tour. Bartali remained reticent to discuss anything he did in WWII and it is a remarkable bunch of research the McConnon's do to uncover the emotional heart and soul of this story. I'm grateful for their devotion to this man and his story. The world is quite lucky to know Gino Bartali beyond just a cycling record.

First, this book needs to be updated: joining many of the persons who are mentioned in the book, Bartali was inducted into Yad Vashem's Righteous Among Nations a few days ago. Perhaps it was only his modesty and unwillingness to have his fame overshadow the efforts, and sufferings, of other less famous people that kept this from happening sooner. Second, the Kindle edition works better than many other Kindle books, in that the illustrations are meshed into the text just as they are in the print edition, and not placed at the end as happens in too many other Kindle books. Third,

the Audible edition, though not advertised as such, syncs with the Kindle app for iPad and the Kindle edition. Many Audible editions too, though they are advertised as not doing so. Finally, this a great read. While it leaves out the details of some of Baratli's last great races against Fausto Coppi, the focus is on Bartali the man, someone who did live up to the ideal of a sports hero who is a good person, who values family and righteous living above all, eschews drugs (unless cigarettes and copious amounts of espresso are drugs) and while voluble, in the end has a good sense of who he is and his place in the world. I will take one Bartali against every single player in the NFL, MLB and NBA combined. He got into sports as a way out of a life of poverty, but he never forgot who he was, where he came from, and his place in the world. In this well written, quick reading book, you will read about a rare person who did his duty not only to his sport, but to humanity.

A very gripping, detailed panorama of Italy before, during and after World War II. A period when the bicycle was central to life. ". . . in 1947 there were some 3.5 million bikes on the road in Italy and just 184,000 cars." De Sica's 1949 film "The Bicycle Thief" visually demonstrated that a stealing a bike "was not just theft; it was an act of forced isolation that stripped a man of his livelihood and exiled him from the world." The book is the story of Gino Bartali, growing up outside of Florence in a one room house with his parents, his brother and his two sisters, and, with no help from the Mussolini government, becoming a national hero as a cyclist, winning the Tour de France twice, once in 1938, age 24, and again in 1948, age 34. The War, and Italian politics, limited his career. The War, however, gave him a chance to play a significant role in helping Italian Jews escape to the South where the Allied armies were in 1943.
