# Accounting For Decision Making And Control

## **Synopsis**

Accounting for Decision Making and Control provides students and managers with an understanding appreciation of the strengths and limitations of an organization's accounting system, thereby allowing them to be more intelligent users of these systems. The Ninth Edition demonstrates that managerial accounting is an integral part of the firm's organizational architecture, not just an isolated set of computational topics. Managers in all organizations, throughout their professional careers, interact with their accounting systems as it is both a source of information for decision making and part of the organization's control mechanisms.

Research and teaching interests involve financial and managerial accounting. He and Professor Ross L. Watts received American Institute of Certified Public Accountants Awards in 1979 and 1980 for their joint papers. He received the American Accounting Association award for Seminal Contribution to Accounting Literature in 2004. He was the 1978 winner of the Competitive Manuscript Award, sponsored by the American Accounting Association, for his paper, "The Costs and Benefits of Cost Allocation." His research, which has come to be called "positive theories of accounting," seeks to understand the costs and benefits of various accounting procedures. He and Watts co-authored a book, Positive Accounting Theory, published by Prentice-Hall in 1986.

I bought this book for college because I had to, not because I wanted to.

It's very good, I enjoyed reading it and it's very neat

The book rental arrived on time with no instructions, label or package to return it when the class is finished. And of course they score a big sale if it is not returned. Please send return instructions to m. olds, 87 st. joseph street, benque, belize, central america.
