Customer Reviews

Rodney L. Moser, PA-C, PhD Sutter Health Medical Group/ Roseville Pediatrics Roseville, California Clinical Coordinator/ Associate Professor Samuel Merritt College Physician Assistant Program Oakland, California

This a tremendous effort on the part of the editors and multiple contributing editors. The format is subsystem based with extensive attention to standard formatting for each subject area. The major primary care maladies in each anatomical subsystem are covered in a clear, concise and easy to read format. Excellent reference for any practitioner. The contributing author list reads like a who's who in Physician Assistant education.

The book is great for review of the PANCE and PANRE. I used it for both exams. The medication dosages have changed but overall, it is a good way to study. I would highly recommend this book!

I found this review book an excellent source of knowledge and simple to understand. This book by passes all the intricate biochemical details and present the meat and potatoes so to speak. The wisdom of the pearls make this book unique. I recommend this book to any professional in a primary care setting.

This is a superb book for any practitioner working in primary care. It covers all important subjects completely and concisely. I used it to review for my boards with the review book that goes with it and I was very prepared. I highly recommend this text.

This is the most comprehensive and concise medical text that I have ever used....so reader friendly. It has over 70 contributors from all over the country.
