Erin Jobst is an Assistant Professor at the Pacific University School of Physical Therapy, in Hillsboro, OR, where she teaches courses covering physiology, pathology, pharmacology, patient care skills and therapeutic exercise. She also has extensive practical experience working in an Acute Care Hospital. She is co-author of *Pharmacology for the Physical Therapist*, and came on

board midstream to complete four chapters, edit 16, and was a big reason for completion of the project. Jobst will serve as the lead author for Physical Therapy Case Studies in Acute Care, and will also serve as lead Editor of the Physical Therapy Case Studies series.

A great way to learn and I enjoyed reading the cases!

Very helpful case book for future physical therapists . Includes study questions at the end of each case to test your knowledge.

This book provides great exposure to real life scenarios and PT actions taken as a result. Dr. Jobst has done a great job compiling authors with expert-level recommendations for different patient scenarios.

Sound clinical reasoning and I love the explanations. Great for new clinicians or students.

My daughter loved the book.

It was for more trauma than I was expecting. Not really my field of experti. Less trauma, more therapy needed

great series!

This is a must have book for any PT working in the Acute Care Setting, Home Care Setting or working with medically complex patients. The book's chapters are broken up by diagnosis, with details about the pathophysiology, medical treatment, and PT interventions. This is a very "dense" book, full of details and useful information about patient's with particular diagnosis that critical care therapists encounter daily. I purchased this book and plan to use it for competencies for my acute care PTs and PTAs.
