Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

the best map you can get that covers the adirondack park. my only complain is that it requires two maps to cover the surrounding area of lake placid, the major tourist hub. ADK used to include a very high quality map in its "High Peak Trails", but no longer so in its latest editions.

The Map is very informative and Very Clear to read, I have two maps and going to order more. One very important fact is it's great instead of paper. Paper gets wet out bush whacking as in earlier years.

Great map from what I can tell. Stinks that they split lake placid in half but o well.

This is a very good map for canoeing and hiking in a beautiful part of the country.

great map good size, plasticy so water won't mess with it but i'd be careful near any fires.

A must have for hiking in the area! The trail book that goes with it is useful to have as well.

Works like a map. Water resistant.
