Modern Plumbing

Synopsis

Modern Plumbing provides information on the design, installation, and service of the different systems found in the field. Basic information regarding safety tools, materials, and equipment is presented. Detailed chapters discuss planning and organizing a plumbing job and the different careers available in the trade. A separate Lab Workbook is available to complement the textbook by offering additional activities and review questions. Plumbing code features prepare students to check local requirements when performing actual work in the field. Step-by-step procedures guide students to learn the correct way of performing various essential tasks. The consistent use of color to represent various components and materials throughout the book helps students visualize different details of components.

Book Information

Customer Reviews

E. Keith Blankenbaker is a leader in technology education curriculum development. He introduced contemporary technology education into the secondary schools where he taught in suburban St. Louis, Missouri. As a teacher educator he developed, and for 25 years, taught construction technology courses for technology education majors at The Ohio State University. During this same period he taught technology education curriculum, laboratory design, and supervised student teachers. He is the author of three Goodheart-Willcox books: Modern Plumbing, Construction and Building Technology and Painting and Decorating, in addition to several other texts. He has served as principal investigator for the Construction Education Curriculum Project, funded by the

Associated General Contractors. He also served as principal investigator for the first edition of the plumbing apprenticeship program offered by the Associated Builders and Contractors. Dr. Blankenbaker has provided leadership on the local, state, and national level. As a secondary school teacher he served as department chairman and was elected president of the regional industrial technology teacher education association. As a teacher educator he was elected program coordinator, served as president of the Ohio Technology Education Association, acted as coordinator for the development of a new technology education curriculum guide for Ohio, and served as a member of the ITEEA Board of Directors. His construction work experience includes designing, building, maintaining, and remodeling residential and light commercial structures. These experiences include forming, placing, and finishing concrete; framing; roofing; plumbing; electrical; installing doors and windows; exterior and interior finish carpentry; cabinetmaking; and painting.

I have basically been living in this book for the last 6 months. If you are an apprentice plumber just starting your first year this is the book for you. It is easy to understand and well written. At least for me. Some of the other students are struggling with it but I don't think it is the book. Got it for \$20 less than the campus book store

Just what I needed for school

Not current with codes. Multiple issues with ICC codes.

Exactly what I wanted, when I wanted it, at a reasonable price.
