Customer Reviews

I bought many titles from this series for my middle and high school students. They were popular with both boys and girls. Boys are particularly difficult to provide for in a reading classroom, this series resolved that problem. They were excited to read them and didn't resent writing about what they'd

read. I recommend the 24/7 series to all teachers. They're a great classroom library builder.

I am a survivor of NF (flesh eating bacteria) and wanted to learn more about what happened to me. My medical records are 11 reams of paper in using medical jargon.

My son had to do a report on staph infections for his 7th grade science class, and had to have a book as one source. I was pleasantly surprised to even find a book for kids about staph. The book was very informative, yet written in a way to keep a kid interested, with graphic designs, etc. It was definitely worth the purchase!
