Learn Italian With Learn Beginner Italian Lessons 1-5: From Learning Like Crazy

Synopsis

This program consists of the first five audio lessons from Learning Italian Like Crazy. This audio course will teach you how to speak authentic conversational Italian. I have only used native Italian speakers in this program to make sure that you develop an authentic Italian accent. If you are not concerned with learning how to speak real everyday conversational Italian, then this program is probably not for you. I understand that there are people who only want to learn enough Italian to communicate with a hotel clerk, restaurant waiter, flight attendant, etc. when they take their next trip to Italy. But there are others who want to learn enough Italian so that they will be able to develop meaningful friendships and relationships with Italian speakers. If the latter category best describes you, then this program is for you. Learning Italian Like Crazy also puts a major emphasis on improving pronunciation. Some people have a natural ability that allows them to quickly develop native-like pronunciation. You probably know someone who is the type of person who I am referring to. We have all seen or heard someone who can imitate the voice of a famous politician, actor, singer or other celebrity so well that you could almost be fooled into thinking that you are actually hearing the famous person speak. Unfortunately, I was not born with that talent. I had to learn certain techniques to improve my pronunciation when learning foreign languages. Those same pronunciation-enhancing techniques are incorporated in this program. So if you've struggled to improve your Italian pronunciation in the past, after completing this program don't be surprised if native Italian speakers begin to compliment you on your pronunciation.

Book Information

Audible Audio Edition

Listening Length: 2 hours 13 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Learning Like Crazy

Audible.com Release Date: October 24, 2016

Language: English

ASIN: B01M3SNF51

Best Sellers Rank: #10 in Books > Audible Audiobooks > Language Instruction > Other Languages

Customer Reviews

The title of my review is "More Of The Same." And

that's a good thing. Although this is my very first time buying a how-to-speak-Italian ebook from this company, I am very familiar with this company's Spanish language products, after purchasing several products from them, including Learn Beginner Spanish. This ebook has the same downside as the ebook for their Learn Beginner Spanish. And that's the fact that there is absolutely no way that anyone can learn Italian or any other foreign language just by reading a transcript (i.e. ebook). I found this ebook as well as the Learn Beginner Spanish ebook to be of little or no benefit. And that's putting it nicely. That's the downside. The upside is that this is not just an ebook. It is actually an audio book that includes 5 audio Italian lessons that are included at no additional cost. That's the reason I have chosen to give this book a 5-star review instead of 1-star review (which I would have done without hesitation if the 5 audio lessons had not been included). Each of the 5 audio lesson provides roughly 30 minutes of Italian lessons. For me, to be able to get the audio without making an additional purchase is truly a bargain. You will find a page in the ebook with specific instructions on how to get access to the 5 downloadable audio Italian lessons. One thing that I want to make clear is that I am not writing a 5-star review simply because 5 audio lessons are included. I can assure you that if the Italian audio lessons were garbage, it wouldn't matter to me how many Italian audio lessons they had included. This is my first audio program for learning Italian that I have ever purchased. I have however previously purchased a learn-Italian ebook. And although this is my first audio program for learning Italian, I can say that as a beginner student of this language, I am finding these audio lessons to be very engaging and fun. I find myself looking forward to winding down at the end of the day and studying my Italian lessons with this program. Anyone who has any experience learning a foreign language knows that the more you enjoy your program, the more you will study, which translates into learning a foreign language quicker. Another positive aspect of both this program and their Spanish program is that the learning-method used has a listening and repeating aspect that is really helping to improve my Italian pronunciation. They also only use native Italian speakers in the audio lessons to help make sure the learner develops an Italian accent with a very natural and authentic sound. One more thing that stands out about their programs is that the engaging and interactive method really helps you to think in a foreign language. When studying Spanish there was a problem that I've had for many years. Every time a Spanish speaker would speak to me or if I watching a Spanish language program on TV, I would try to translate every Spanish phrase that I heard in my head. Which obviously wasn't too effective because by the time I'd finish translating a phrase in my head, the

Spanish speaker is already finishing another phrase or two. But the interactive method used in both their Spanish and Italian programs really encourages me to actually

think in a foreign language instead of trying to mentally translate from English into Italian. My final advice is to get this ebook. Go straight to the page in the ebook that tells you how to download the mp3 audio lessons. Then forget all about the ebook, and just use the audio lessons to learn how to speak Italian. If you follow these instructions, I think you will be very happy with your purchase.

I bought this Italian program for my wife. We are planning to take a trip to Venice, Italy later this summer. My wife enjoys this Italian course very much. She listens to it during her commute to work, and she even uses it at home sometimes instead of watching TV. I am very pleased that she is pleased. Seeing her happy with the program is all it takes to make me happy with this purchase. Over the weekend, we drove to the mall while my wife was practicing her Italian with the audio program in the car. I was surprised at how quickly I picked up several words and phrases during the short ride to the mall. On a side note, I am a happy customer from a learning-Spanish program by the same company which is why I decided to buy their learning-Italian version for my wife. Now I'm also thinking about using this one to learn Italian.

I came across this audio program because I use the author's Spanish programs when I develop my lessons plans to teach my students Spanish. After seeing how easy the creator of the program makes learning Spanish, and having the desire to learn another foreign language, I finally decided to get his how-to-speak-Italian program. And so far I must say that I like this program very much, mainly because the program uses the same speech-provoking techniques used in the other programs. Hopefully, the learning-French version of this program will soon be released.

After giving the Spanish program created by the same company a try, I thought I'd try out the Italian program. This program is another winner. I hope to learn some other foreign languages with this same teaching method of listen and repeat. Which by the way is working wonders for my pronunciation in the foreign language.

This is the same method that you will find used in their other foreign language products. And I consider that a good thing since it is really helping me get the accent and pronunciation that I may not have been able to develop using another program.

I bought another audio-language program from this company to learn Spanish. After really liking their method I decided to give Italian a try. But why only audio programs for Spanish and Italian? I'd consider learning French too with this method.

This system of learning is really helping me to increase my confidence in speaking another language. Personally, I prefer to use the ebook and audio book together. I know the author recommends against it. But that's what works for me.

This company makes the best audio language-learning programs. Not only are their prices incredibly affordable, their system is highly effective.
