The Science Of Psychology: An Appreciative View, 3rd Edition

Synopsis

When things go right for students—things go right for instructors! Focusing on why things go right, *The Science of Psychology: An Appreciation View*, Third Edition, helps students understand and appreciate psychology as a science and as an integrated whole. Informed by student data, the third edition's program extends these themes and enhances their pedagogical value by guiding students toward topics they find the most challenging and then offering new learning resources to help students master them.

Customer Reviews

Laura King did her undergraduate work at Kenyon College, where, an English major, she declared a second major, in psychology, during the second semester of her junior year. She completed her A.B. in English with high honors and distinction and in psychology with distinction in 1986. Laura then did graduate work at Michigan State University and the University of California, Davis, receiving her Ph.D. in personality psychology in 1991. Laura began her career at Southern Methodist University in Dallas, moving to the University of Missouri, Columbia, in 2001, where she is now a professor. In addition to seminars in the development of character, social psychology, and personality psychology, she has taught undergraduate lecture courses in introductory psychology, introduction to personality psychology, and social psychology. At SMU, she received six different teaching awards, including the "M" award for "sustained excellence" in 1999. At the University of Missouri, she received the Chancellor's Award for Outstanding

Research and Creative Activity in 2004. Her research, which has been funded by the National Institutes for Mental Health, has focused on a variety of topics relevant to the question of what it is that makes for a good life. She has studied goals, life stories, happiness, well-being, and meaning in life. In general, her work reflects an enduring interest in studying what is good and healthy in people. In 2001, her research accomplishments were recognized by a Templeton Prize in positive psychology. Laura's research (often in collaboration with undergraduate and graduate students) has been published in the Journal of Personality and Social Psychology, Personality and Social Psychology Bulletin, Cognition and Emotion, the Journal of Personality, and other publications. A new paper on the place of regrets in maturity is forthcoming in the American Psychologist. Currently editor-in-chief of the Journal of Research in Personality, Laura has also served as associate editor of Personality and Social Psychology Bulletin and the Journal of Personality and Social Psychology, as well as on numerous grant panels. She has edited or co-edited special sections of the Journal of Personality and the American Psychologist. In "real life," Laura is an accomplished cook and enjoys listening to music (mostly jazz vocalists and singer-songwriters), gardening, and chasing Sam, her 3-year-old son.

The Science of Psychology was written so that the student could truly understand the content. The content and side notes were interesting! A very easy read!

I loved this book. I needed it for a psychology class and found the book very helpful outside of the class!

Good light reading before bed.

very informative. I learnt quiet a bit from this book and class.

Loved this book worked best for my class . It has stories and description that relate and then the scientific term .

The book was just what I needed. I just wish there had been an option to speed up the shipping.

Rental was helpful during my course. Great book and rental price

VERY GOOD CONDITION. HIGHLY RECOMMEND ORDERING!
