Grandkids Absolutely LOVE!

I got this book for my gifted 7 year old. Now we can answer and learn new things. A MUST HAVE!!!Annmarie F.Daytona Bch, FL

Great book

Thanks

My 5 year old loves browsing and reading through the pages. you don't have to follow index. you can just open any page and read question and answer. Pages are colorful and answers are short and informative. That keeps my daughter very much interested and motivated to read it by herself. Some of the questions open up a discussion among us which I really like. If we want to know more we either read other books related to the question or lookup online and 'discuss'. In short I highly recommend this book for kids > 3 yrs

Great book!!! I have a 7 and 8 year old that love to read this book. It has many topics and its easy for kids to understand.

This book has lots of interesting obscure facts, e.g. the size of the first computer, how ancient gladiators dressed, lizards with tails that fall off. However, the normal questions that kids ask like "how do airplanes fly?" "why is the sky blue" are NOT in here. Or, if the answers are there, the terrible index won't really tell you where they are. The index often lists incorrect pages or refers to a page that has only marginal relation to the actual word.
