SCIENCE EXPLORER ASTRONOMY STUDENT EDITION 2007C

Synopsis

Prentice Hall Science Explorer *2007* Astronomy Lead author Michael Padilla once again sets the standard for engaging, hands-on science exploration. The new Prentice Hall Science Explorer now offers 16 small books that give you the flexibility to customize lessons to match your curriculum. A new title, *The Nature of Science and Technology*, introduces students to the sciences, scientific methods, skills, and technology and design concepts they'll need to succeed in middle grades science! Whether using the text alone or in tandem with exceptional ancillaries and technology, teachers can utilize differentiated instruction components to meet the needs of every student at every learning level. Unparalleled technology activates text content and takes science beyond the classroom and into the real world. A proven formula for reading success Before, during, and after reading support in every lesson enables students to fully understand the big ideas of science. Integrate labs with ease! More than 1,500 labs and activities are right at your fingertips with the Lab zone *2007* Easy Planner CD-ROM. Easily search all labs by time, content, or standard. Graphics come alive online Active Art helps students see text art in a new way by providing interactive, hands-on explorations of key concepts that reinforce learning. A Prentice Hall Exclusive Partnership! Emmy Award-winning Discovery Channel School *2007* videos and DVDs provide visual support for every chapter and support learning with current, real-world examples.

Book Information

Hardcover

Publisher: PRENTICE HALL; Student edition (January 6, 2006)

Language: English

ISBN-10: 0132011549

ISBN-13: 978-0132011549

Product Dimensions: 8.8 x 0.6 x 11.1 inches

Shipping Weight: 1.6 pounds

Average Customer Review: 5.0 out of 5 stars 11 customer reviews

Best Sellers Rank: #695,584 in Books (See Top 100 in Books) #35 in *2007* Books > Teens >

A Prentice Hall Exclusive Partnership! Emmy Award-winning Discovery Channel School— videos and DVDs provide visual support for every chapter and support learning with current, real-world examples.

This book is used in my son's middle school. He asked me to purchase it so that he can use it to do his homework. He found this book very helpful. I have purchased two more Science Explorer books (Inside Earth and Weather and Climate). He has found all of these titles helpful. It is always a good thing if the dad buys a book and the kid actually uses it and finds it helpful!

Came in great condition, especially for the price!!

ok Good Conditions

Great book for middle school science! My sis uses it for her class all the time!

Getting a copy of our son's science book has been a great help. I enjoyed looking through it, too!
Thank you!

This is a book that my son will be needing for the next quarter and since his school does not have the budget to purchase enough books for all students, we decided to buy one for him.

I was so worried when my school decided that students would have to purchase their books. However, has made the task so easy. Take a look when you buy books.

Shipper delivered as advertised. Publisher does a nice job of compiling information and using on-line activities, however I would skip Chapter 2 on Exploring Space until end of book/lesson plan as it only serves to distract the students from the subject.
