The 100+ Series Geometry

Synopsis

Geometry links all the activities to the NCTM Standards and provides students with practice in the skill areas required to understand geometry concepts. Reviewing concepts presented in beginning geometry plus exercises involving symmetry, rotations, translations, fractals, the coordinate plane, parallel lines, two-column proofs, intersections, bisecting angles, sectors and arcs, tangents, properties of geometric figures, surface area and volume, and trigonometry are all included. Examples of solution methods are presented at the top of each page and puzzles and riddles help gauge the success of the concepts learned. Each activity has been linked to the related NCTM standard and is identified in the table of contents. Answer key included.

Customer Reviews

This workbook is very nice and has a lot of great worksheets, but is not for the average 5-8 grader. The geometry is not introductory.

great for the beginner learning in geo. I've been homeschooling for 15 some yrs. now and this is just clicking

Quick E-Mail Service, Fast S&H, A+++ Quality. Strong Recommendation

I am a high school math teacher. This is a great resource for teachers.

great books
