# Barron's NCLEX-RN Flash Cards, 2nd Edition

## Synopsis

This brand-new set of 400 flash cards will help nursing students succeed on the National Council Licensure Examination, which certifies them as registered nurses. The cards are divided into two categories: 300 cards identify medications and their uses; and 100 cards present questions typical of those found on recent NCLEX-RN exams. Each medication card names a medication on the front and lists its uses, how it is administered, and its side effects on the back. The 100 test question cards present answers on their reverse side and cover topics that include safe care and environment, safety and infection control, health promotion and maintenance, and other subjects that nursing students will encounter when they take the exam.

## Book Information

Cards: 408 pages

Publisher: Barron's Educational Series; 2 edition (May 1, 2016)

## Customer Reviews

These drug cards are just what I need to help study for the NCLEX. I'm not quite ready to take it, but the Barron's cards are an excellent tool for studying. They are the most comprehensive study tool, and I like that they are portable. I keep a good stack of them in my purse and pull them out when I'm waiting for carpool or in line at the coffee place. Great item

love these! the best thing for a nursing student!

These were great aid in studying for my nclex

Great.. only wish it would come with a medication list (or maybe cards with a list) so that I don't have to thumb through all of them in order to find a medication that may or may not be there... otherwise, a good product. Side-effects are straight and to the point.

Nice cards

I wish they had more info...

Good condition and great study guide!

If you are looking for help in Pharmacology this flash card set is for you. If you are looking for help with NCLEX questions, then I suggest looking elsewhere because you will not get much from this set.
