Paint By Sticker Kids: Zoo Animals: Create 10 Pictures One Sticker At A Time!

Synopsis

Find the sticker, peel the sticker, place the sticker. And sticker by sticker, a koala appears! Or an elephant, frog, red panda, puffin, peacock, snake, giraffe, tiger, or gorilla. (And no mess to clean up!) Designed for children ages 5 and up, Paint by Sticker Kids: Zoo Animals uses low-poly art—a computer style that renders 3-D images out of polygon shapes—and removable color stickers so that kids can create 10 vibrant works of art. The stickers are larger, as befits the younger audience, and the card stock pages are perforated for easy removal, making them suitable for displaying.

My eight year old son loves this book! We got it for his Easter basket and he did the elephant last

night. I think we will get him the sea creature one that is coming out soon. These are great for road trips and doctor office waits! We will be using this on a plane trip in a few days! We have some other similar books from usborne. In many ways I like this better! This style is great for big kids, though!

My 5 year old loves the sticker picture crafts that Michaels craft stores occasionally have, so I had high hopes for this book. But he only finished one page and wasn't interested in the others. He didn't have any trouble with the size of the stickers (mentioned in other reviews) but they are rather dull to look at. The pages and stickers are high quality and stick well.

I really like this, I am an adult, and wanted to do something different, I brought it after reading review, and I have to say I am happy with it. I hope there will be many more of these books and some that would be aimed adults, teens. I don't think this book is just for kids, it will work fine for anyone.

For Christmas gift giving at family functions, I like to get the kids something that they can actually play with right away (so the grownups can relax with their adult beverages, chat, and watch football). This sticker book is perfect for that, with an added bonus that it makes no loud noises nor requires batteries. After buying this book for the little ones, I shopped for the adult version for myself! The picture pages and the sticker pages are both perforated, so you can tear them out and hand around to multiple kids. I got this book for my twin 1st-grade nieces, but I think younger kids could still be successful as long as they can recognize numbers and match them up. Most of the pictures need around 50 stickers to complete, so no boredom or frustration should set in. My one star off is because this particular book has mostly monochromatic animals (hey, it's nature, right?). The pictures are still cool, but it would have been nice to have some more colorful animals to choose from: a parrot, fish, or butterfly?

My 9 year old and 5 year old love doing these. They really take their time and are impressed by the results, which look pretty cool. Fun activity for kids.

My five year old granddaughter loved this activity. At first she needed help, but then caught on and finished the book herself. I wish there were more titles to purchase.

my boys ages 3 & 6 have really enjoyed these books. we bought this one and the dinosaur and

under the sea versions. the pictures are so fun and colorful and it allows my 3 yo to work on his hand/eye coordination and my 6yo enjoys seeing the pictures come to life. i would HIGHLY recommend these books. great for rainy/hot days and don't forget gifts! seriously! this will be played with more than most "toys" and all for under \$10. what a steal!!

Put this in the Easter basket of my grand-daughter! My husband saw this in a catalog for a much higher price. It's a cute idea and she had fun working with us to complete a picture. Good clean fun and the price made it a good value. I have shared this with friends and they have purchased as well. TIP - give them a pair of tweezers. It makes working with the stickers even more fun.
