Pharmacology And Ototoxicity For Audiologists

Synopsis

This highly anticipated text is the only publication on pharmacology and ototoxicity written specifically for audiologists. With contributions from leading audiologists, basic scientists, pharmacologists, and otolaryngologists, *Pharmacology and Ototoxicity for Audiologists* provides both basic and advanced coverage of topics critical to successful clinical practice. Fundamental concepts and terminology of pharmacology, biochemistry of the auditory system, and mechanisms of toxicity are covered, along with specific chapters on drug and noise-induced ototoxicity. This text is absolutely essential for anyone working in the hearing sciences and hearing healthcare.

Book Information

Hardcover: 440 pages

Publisher: Delmar Cengage Learning; 1 edition (August 25, 2006)

Language: English

ISBN-10: 1418011304

ISBN-13: 978-1418011307

Product Dimensions: 1 x 8 x 9.5 inches

Shipping Weight: 2 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 6 customer reviews

Best Sellers Rank: #600,904 in Books (See Top 100 in Books) #69 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Toxicology](#) #123 in [Books > Medical Books > Pharmacology > Toxicology](#) #479 in [Books > Textbooks > Medicine & Health Sciences > Allied Health Services > Audiology & Speech Pathology](#)

Customer Reviews

The information is covered in the Diagnostics and the Medical Aspects course. I think this area of study is gaining interest in the profession, particularly due to the ground-breaking and cutting-edge research undertaken by the author.

Kathleen Campbell, Ph.D., is Professor and Director of Audiology Research at Southern Illinois University School of Medicine in Springfield, IL. She directed and provided audiology services for over 20 years in Canada and the United States but now focuses primarily on both basic and clinical research. For over 20 years, she has also taught audiology to faculty, residents, and medical students in otolaryngology, pediatrics, neurology, primary care, neonatology, and surgery. She is the author of *Essential Audiology for Physicians* and numerous book chapters and articles. She

currently serves on the American Academy of Audiology Board of Directors. She consults in audiology clinical management, clinical trials, and as an expert witness. Dr. Campbell is also a prolific researcher, publishing numerous articles on both basic science and clinical topics in various areas of auditory science and auditory disorders. She is a noted lecturer both nationally and internationally focusing on audiologic assessment of auditory disorders, and particularly ototoxicity, noise-induced hearing loss and otoprotective agents. She has received an NIH Clinical Investigator Development Award, the James A. Shannon Director's Award from NIH for her research in ototoxicity, a Special Presidential Citation from the American Academy of Audiology for her work in Professional Practice Standards, has been named an ASHA Fellow and is in Who's Who in America. Dr. Campbell also holds several patents for otoprotective agents and is planning clinical trials. Dr. Campbell recently received the 2004 Copper Black Award for Creative Achievement from American Mensa for her work in otoprotective agents.

I originally borrowed this book from a friend. As I was going through the class I kept saying to myself, I should have bought the book. Guess I really wanted it because on the last day of class I spilled garlic butter all over her book so I had to buy her a new one.

OK. THANKS

Excellent

This was shipped as indicated and rec'd on time. Book was in excellent condition and has been one to keep as a reference.

good basic introduction to pharmacology and ototoxicity for beginners

fantastic book, wonderful reference. Will keep this book forever. This is one of the best reference books ever and required reading for a class. Highly recommend.
